

SAFETY BASICS

FALL PREVENTION TIPS

Wear proper footwear. Warehouse and shop employees should wear durable non-slip shoes.

Have adequate lighting throughout the workplace. Report any dim, flickering and blown out bulbs to management.

Walk slowly in places where there is a greater likelihood of fall hazards: entrances to buildings, parking lots, rest rooms and break areas.

Walk carefully during icy and rainy weather.

Add traction to areas where there may be wet floors. This includes placing rubber mats in building entrances and kitchens.

Secure all wires and electrical cords
